ULTIMATE EXCHANGE COMPONENTS

YOUR PARTNER IN EARTHMOVING

ULTIMATE EXCHANGE COMPONENTS

Your Partner in Earthmoving

Ultimate Exchange Components (UEC) is a trusted supplier of refurbished earthmoving machinery, hydraulic cylinders, and new, used, and service exchange parts and components. With more than 30 years of industry experience, we support mining, construction, and earthmoving operations with practical, cost-effective solutions that keep equipment reliable and downtime to a minimum.

We specialise in Service Exchange programmes, full machine and component rebuilds, and precision engineering services. Our approach is partnership-driven: understanding operational requirements and delivering solutions that extend equipment life, reduce operating costs, and consistently meet OEM standards.

CORE SERVICES

Machine & Component Rebuilds

UEC's core expertise lies in the refurbishment and rebuild of heavy earthmoving equipment and critical components. Our skilled technicians restore machines and components to optimal operating condition, improving reliability, performance, and service life. All rebuilds are completed to OEM specifications using proven processes and strict quality control.

Hydraulic Cylinders

We manufacture and refurbish hydraulic cylinders for a wide range of earthmoving machinery. Customers can choose between outright purchase of refurbished or new units, or our cost-effective Service Exchange option. Every cylinder is rigorously inspected and tested to ensure reliable performance in demanding operating conditions.

Parts & Components

We supply a comprehensive range of new, used, and refurbished parts and components, allowing customers to select the most suitable solution for their budget and application. Our Service Exchange programme offers fast turnaround times while reducing costs and supporting sustainable reuse, without compromising on quality.

Field Service Support

Our experienced field service teams provide on-site support, including mobile line boring and boilermaker

services, ensuring essential repairs and alignment work can be completed efficiently at site when required.

Specialist Capabilities

In addition to full rebuilds, UEC offers a range of specialist engineering and refurbishment services, including:

- Bucket refurbishment and structural repairs
- Custom engineering and fabrication
- Manufacture of pins and bushes to OEM specification
- Line boring for accurate alignment and reduced component wear
- Frame, boom, stick, and undercarriage repairs

Engineering & Workshop Capacity

UEC operates a fully equipped workshop with extensive machining, CNC, boring, welding, and lifting capabilities. Our facilities are designed to handle both small and large components, enabling complex refurbishments and large-scale rebuild projects to be completed in-house. This depth of capability allows us to maintain quality control, shorten lead times, and deliver dependable turnaround times.

Our Commitment

We service and support small, medium, and large mining contractors and mining houses locally and across borders. At Ultimate Exchange Components, we focus on building long-term partnerships based on reliability, technical expertise, and consistent service delivery.

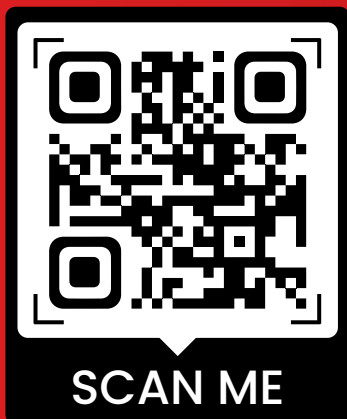

Ultimate Exchange Components – Engineered to Restore, Support, and Extend the Life of Your Earthmoving Equipment.

WHY ULTIMATE EXCHANGE COMPONENTS

- **150+ years of combined earthmoving industry experience**
- Specialists in **machine and component rebuilds**
- **New, used, and Service Exchange parts and components** available
- Hydraulic cylinders **manufactured and refurbished to OEM standards**
- Extensive **in-house engineering and machining capability**
- Mobile field services, including **line boring and boilermaker support**
- Trusted partner to **local and cross-border mining operations**
